Summary

POC Glycated Hemoglobin Analyzer is the Point-of-care Glycated Hemoglobin Analyzer, which is defined as a medical diagnostic analyzer at or near the point of care—that is, at the time and place of patient care.

Glycated hemoglobin (HbA1c) levels, which reflect the average plasma glucose concentration over the preceding three months, play a pivotal role in the diagnosis, assessment, and monitoring of diabetes.

The immediate feedback of HbA1c levels is highly effective for controlling plasma glucose levels and point-of-care (POC) instruments, characterized as fast, portable, and easy-to-use, have been shown to be suitable for providing rapid feedback of HbA1c levels.
