Abstracts

Power-factor correction increases the power factor of a load, improving efficiency for the distribution system to which it is attached. Linear loads with low power factor (such as induction motors) can be corrected with a passive network of capacitors or inductors. Non-linear loads, such as rectifiers, distort the current drawn from the system. In such cases, active or passive power factor correction may be used to counteract the distortion and raise the power factor. The devices for correction of the power factor may be at a central substation, spread out over a distribution system, or built into power-consuming equipment.

According to APO Research, The global Power Factor Correction Devices market is projected to grow from US$ million in 2024 to US$ million by 2030, at a Compound Annual Growth Rate (CAGR) of % during the forecast period.

Global Power Factor Correction Devices main players are ABB, Schneider, Siemens, Eaton, etc. Global top four manufacturers hold a share nearly 40%. Asia-Pacific is the largest market, with a share above 50%.

This report presents an overview of global market for Power Factor Correction Devices, revenue and gross margin. Analyses of the global market trends, with historic market revenue for 2019 - 2023, estimates for 2024, and projections of CAGR through 2030.

This report researches the key producers of Power Factor Correction Devices, also provides the value of main regions and countries. Of the upcoming market potential for Power Factor Correction Devices, and key regions or countries of focus to forecast this market into various segments and sub-segments. Country specific data and market

value analysis for the U.S., Canada, Mexico, Brazil, China, Japan, South Korea, Southeast Asia, India, Germany, the U.K., Italy, Middle East, Africa, and Other Countries.

This report focuses on the Power Factor Correction Devices revenue, market share and industry ranking of main companies, data from 2019 to 2024. Identification of the major stakeholders in the global Power Factor Correction Devices market, and analysis of their competitive landscape and market positioning based on recent developments and segmental revenues. This report will help stakeholders to understand the competitive landscape and gain more insights and position their businesses and market strategies in a better way.

All companies have demonstrated varying levels of sales growth and profitability over the past six years, while some companies have experienced consistent growth, others have shown fluctuations in performance. The overall trend suggests a positive outlook for the global @@@@ company landscape, with companies adapting to market dynamics and maintaining profitability amidst changing conditions.

Descriptive company profiles of the major global players, including ABB, Schneider, Siemens, Eaton, GE Grid Solutions, NISSIN ELECTRIC, Guilin Power Capacitor, Hubbell and Xian XD Power, etc.

Power Factor Correction Devices segment by Company

ABB

Schneider

Siemens

Eaton

GE Grid Solutions

NISSIN ELECTRIC

Guilin Power Capacitor

Hubbell

Study Objectives

1. To analyze and research the global Power Factor Correction Devices status and future forecast, involving, revenue, growth rate (CAGR), market share, historical and forecast.

2. To present the Power Factor Correction Devices key companies, revenue, market share, and recent developments.

3. To split the Power Factor Correction Devices breakdown data by regions, type, companies, and application.

4. To analyze the global and key regions Power Factor Correction Devices market potential and advantage, opportunity and challenge, restraints, and risks.

5. To identify Power Factor Correction Devices significant trends, drivers, influence factors in global and regions.

+44 20 8123 2220
info@marketpublishers.com

6. To analyze Power Factor Correction Devices competitive developments such as expansions, agreements, new product launches, and acquisitions in the market.

Reasons to Buy This Report

1. This report will help the readers to understand the competition within the industries and strategies for the competitive environment to enhance the potential profit. The report also focuses on the competitive landscape of the global Power Factor Correction Devices market, and introduces in detail the market share, industry ranking, competitor ecosystem, market performance, new product development, operation situation, expansion, and acquisition. etc. of the main players, which helps the readers to identify the main competitors and deeply understand the competition pattern of the market.

2. This report will help stakeholders to understand the global industry status and trends of Power Factor Correction Devices and provides them with information on key market drivers, restraints, challenges, and opportunities.

3. This report will help stakeholders to understand competitors better and gain more insights to strengthen their position in their businesses. The competitive landscape section includes the market share and rank (in sales and value), competitor ecosystem, new product development, expansion, and acquisition.

4. This report stays updated with novel technology integration, features, and the latest developments in the market.

5. This report helps stakeholders to gain insights into which regions to target globally.

6. This report helps stakeholders to gain insights into the end-user perception concerning the adoption of Power Factor Correction Devices.

7. This report helps stakeholders to identify some of the key players in the market and understand their valuable contribution.

Chapter Outline

Chapter 1: Introduces the report scope of the report, global total market size.

Chapter 2: Analysis key trends, drivers, challenges, and opportunities within the global Power Factor Correction Devices industry.

+44 20 8123 2220
info@marketpublishers.com

Chapter 3: Detailed analysis of Power Factor Correction Devices company competitive landscape, revenue market share, latest development plan, merger, and acquisition information, etc.

Chapter 4: Provides the analysis of various market segments by type, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different market segments.

Chapter 5: Provides the analysis of various market segments by application, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different downstream markets.

Chapter 6: Sales value of Power Factor Correction Devices in regional level. It provides a quantitative analysis of the market size and development potential of each region and introduces the market development, future development prospects, market space, and market size of key country in the world.

Chapter 7: Sales value of Power Factor Correction Devices in country level. It provides sigmate data by type, and by application for each country/region.

Chapter 8: Provides profiles of key players, introducing the basic situation of the main companies in the market in detail, including revenue, gross margin, product introduction, recent development, etc.

Chapter 9: Concluding Insights.

Chapter 9: Concluding Insights.
