Abstracts

Loyalty programs are structured marketing strategies designed by merchants to encourage customers to continue to shop at or use the services of businesses associated with each program. These programs exist covering most types of business, each one having varying features and rewards schemes.

Loyalty programs have emerged as one of the key marketing tools in the global retail banking industry. Retail banks offer a number of loyalty programs in developed economies, however many of these are commoditized. This has compelled banks to introduce innovative programs in order to remain both competitive and profitable.

There is also an increased pressure on costs due to new regulatory trends in last five years. Loyalty programs are being viewed as an important revenue-driving tool and have been proven to reduce customer acquisition costs. Retail banking in emerging economies is still in its developmental stages, as illustrated by its relatively low loyalty program penetration rates.

Retail banking is a typical mass-market banking industry that lets its customers use local branches of the more widespread commercial banking establishments. Retail banking is also generally known as consumer banking. Its services include mortgages, certificates of deposit (CDs), savings and checking accounts, debit/credit cards, and personal loans. The retail banking sector mainly focuses on catering to the needs of its retail clients.

According to APO Research, The global Retail Bank Loyalty Program market is projected to grow from US\$ million in 2024 to US\$ million by 2030, at a Compound Annual Growth Rate (CAGR) of % during the forecast period.

Global Retail Bank Loyalty Program main players are Maritz, FIS Corporate, IBM, Aimia, etc. Global top four manufacturers hold a share over 55%. North America is the largest market, with a share nearly 45%.
