Abstracts

This report studies the Seismic Isolation Systems market, Seismic Isolation Systems is the system used to reduce the effects of earthquake ground shaking on structure, their components and protect them from damaging. The system decouples the building or structure from the horizontal components of the ground motion by interposing structural elements with low horizontal stiffness between the structure and the foundation. This gives the structure a fundamental frequency that is much lower than both its fixed-base frequency and the predominant frequencies of the ground motion.

According to APO Research, The global Seismic Isolation Systems market was estimated at US\$ million in 2023 and is projected to reach a revised size of US\$ million by 2030, witnessing a CAGR of xx% during the forecast period 2024-2030.

Global Seismic Isolation Systems key players include Yunnan Quakesafe Seismic, OILES CORPORATION, Nippon Steel Engineering, SWCC SHOWA, etc. Global top four manufacturers hold a share over 50%.
