### Summary

Spare Parts Logistics (SPL) is planned logistics in the event of component failure. Spare parts logistics ensures a smooth and timely delivery of spare parts, because the failure of relevant components in machines, production facilities or medical technology causes high downtime costs. SPL enables logistics managers to efficiently plan the supply chain (SCM) in after sales services. The precisely fitting delivery of required spare parts in the aftermarket to dealers and service technicians on site becomes cost-efficient and plannable. The right parts get to where they are needed at the right time, according to demand.
