Abstracts

Texture paint is a special paint that can maintain the texture design even after drying, such as stippling. There are several different varieties of this paint, smooth, sandy or rough. Rough has a popcorn effect and is usually used as a ceiling paint. Always look for the paint that can give you the longest drying time to meet your experience level. The longer the drying time, the more chance you must make the paint have a dramatic effect or correct any defects before the paint solidifies.
