Abstracts

This report studies the Hardware-based Full Disk Encryption market, Hardware-based Full Disk Encryption (FDE) is available from many hard disk drive (HDD) vendors, including: Seagate Technology, Western Digital, Samsung, Toshiba and also solid-state drive vendors such as SanDisk, Samsung, Micron and Integral Memory. The symmetric encryption key is maintained independently from the CPU, thus removing computer memory as a potential attack vector.

Full-disk encryption is encryption at the hardware level. FDE works by automatically converting data on a hard drive into a form that cannot be understood by anyone who doesn’t have the key to “undo” the conversion.

According to APO Research, The global Hardware-based Full Disk Encryption market was valued at US$ million in 2023 and is anticipated to reach US$ million by 2030, witnessing a CAGR of xx% during the forecast period 2024-2030.

Southeast Asia is the largest region of Hardware-based Full Disk Encryption, with a market share about 35%, followed by China, Europe and North America, etc. Seagate Technology PLC, Western Digital Corp, Samsung Electronics, Toshiba and Kingston are the top 5 manufacturers of industry, and they had about 75% combined market share.
