

Nepheline Syenite Industry Research Report 2023

<https://marketpublishers.com/r/N2F17417ED31EN.html>

Date: August 2023

Pages: 68

Price: US\$ 2,950.00 (Single User License)

ID: N2F17417ED31EN

Abstracts

Nepheline syenite is a commercially prepared, rare feldspathoid-rich rock product. The process control found in most nepheline syenite operations offers a controlled level of Fe₂O₃ that can help to improve fired color. Most noncommercial nepheline syenite deposits are gray or dark in color and have high iron levels that severely limit their potential in industrial applications.

Highlights

The global Nepheline Syenite market is projected to reach US\$ million by 2028 from an estimated US\$ million in 2022, at a CAGR of % during 2024 and 2029.

Canada, Norway and Russia were the three largest nepheline syenite production countries in the world. Other countries with less production included Brazil, China and Turkey. The leading producing company was Belgium-based SCR Sibelco NV, through its subsidiaries Sibelco Europe in Norway and Unimin Corp. in Canada. Others included Finetion Industrial Minerals Ltd. in China and OJSC Apatit AG in Russia.

In 2019,
