## Abstracts

The surface-mount IC packages that are assembled on a PCB are available in different types. The most popular ones among these are the QFN packages.

QFN is a leadframe based, plastic encapsulated chip scale package (CSP) that provides customers with an ideal choice for many applications where size, weight and thermal and electrical performance are important. A leadless package, QFN's electrical connections are achieved by way of lands located on the bottom side of the component to the surface of the PCB. QFN packages have proven to be successful for a number of applications such as wireless handset, power management, analog baseband and Bluetooth devices.
