Abstracts

Ultrafiltration (UF) is a variety of membrane filtration in which forces like pressure or concentration gradients lead to a separation through a semipermeable membrane. Suspended solids and solutes of high molecular weight are retained in the so-called retentate, while water and low molecular weight solutes pass through the membrane in the permeate (filtrate).

According to APO Research, The global Ultrafiltration Membrane Filtration market was valued at US\$ million in 2023 and is anticipated to reach US\$ million by 2030, witnessing a CAGR of xx% during the forecast period 2024-2030.

The ultrafiltration membrane filtration industry is not highly concentrated and there are many manufacturers in the world, such as Koch, Asahi Kasei, Suez, DuPont and Toray. The top 3 have about 12% of the market share.
