## **Abstracts**

The 2016 Arcluster Market Forecast Report on Commercial Drones covers the market dynamics, assumptions, forces, segments, sizes and forecasts of commercial drones for the period 2015 – 2020. This report is a presentation brief targeted primarily at providing the market trends and forecasts with demand side insights and key vendor profiles. Market data, which forms the backbone of the study, has been gathered through a rigorous period of information from both secondary and primary sources through interviews with industry participants, manufacturers, enterprises, small and medium businesses, channel players and regulators.

Data gathered from these interviews and surveys was analyzed, and engineered to understand spending, demand and supply patterns and to estimate market sizes and forecasts. The resultant data was cross-checked through market-data associations and then validated through multiple consistency check points.

The market for commercial drones is segmented into three categories –Segments, Verticals and Regions. Each of these categories are further segmented by types.

By Segments – the market size and forecasts for commercial drones are provided by Hardware, Software and Services.

By Verticals – the market size and forecasts are provided for 7 verticals – Energy and Utilities, Agriculture, Real Estate, Mining and Construction, News, Media & Entertainment, Logistics and Supply Chain & Others.

By Regions – the market size and forecasts are provided for 5 regions – North America, Europe, Middle-East & Africa, Central/Latin America and Asia-Pacific.

The 2016 forecast report on Commercial Drones is part of an ongoing series of market reports that focus on micro emerging trends, market sizes and forecasts of drones and UAVs across multiple regions and countries.

Arcluster's forecast report on commercial drones is a useful marketing, strategy and business planning aid to companies and corporations that cater to the UAV and drones market. Readers can benefit from the wealth of quantitative market data on various segments and perspectives across the ecosystem. These data points can be valuable enablers for decision makers to quickly understand the current and evolving market opportunities, helping them to make marketing decisions and solutions.

## Contents
