Abstracts

The market report on Edible Insects provides insights into key market requirements gathered from consumers, stores, retail outlets, and shops and their preferences, priorities, and perception of commercially available edible insects. The study also covers key adoption factors such as user preferences on palate, tastes, age groups, consumption patterns, and coatings.

The Edible Insects market report provides an in-depth analysis on the market size and forecasts of the variety of segments of commercial available edible insects and bugs, including market opportunities across the globe. The study also covers additional market forecast data on four segments within the edible insect ecosystem – Raw, Coated, Powdered and Paste. Further to this, the report also provides market data for sub-segments within the Coated and Powdered Edible Insect market – including bars, candy, chocolate, cookies, chips, crackers, snack packs, flours, baking powders, protein powders, salts, and others.

The report also provides the market opportunities, sizes, and forecasts of edible insects by ten different types of insect. The analysis in this report will help both edible bug vendors, suppliers, harvesters and food and beverage companies to develop strategies, marketing goals and business decisions based on the actionable market intelligence from this report.

This report has been built on a rigorous period of information gathering from both

secondary and primary sources through several interviews with industry participants, retail stores, shops, buyers, consumers, insect farms, organizations, bodies, suppliers, channel players and regulators. Data gathered from these interviews and surveys was curated, analyzed, and engineered to understand buying, spending, demand, and supply patterns and to estimate market sizes and forecasts. The resultant data was checked for applicability across the insect, food and farm management value chains through market-data associations and then further validated through multiple check points to check consistencies, error samples, variances.

The 2018 syndicated study report on Edible Insects is part of an ongoing series of market reports that focus on micro emerging trends in the sustainable food and beverage markets across multiple regions and countries.
