Abstracts

In-depth Analysis and Data-driven Insights on the Impact of COVID-19 Included in this Global Antimicrobial Coatings Market Report

The global antimicrobial coatings market by revenue is expected to grow at a CAGR of approx. 6% during 2020–2026.

The outbreak of the COVID-19 pandemic has significantly influenced the market. The demand for antimicrobial coating from the healthcare industry has increased drastically to prevent the spread of hospital-acquired infections (HAIs) during the pandemic. Over 2 million people are affected, and 90,000 people die annually due to HAIs, thereby emerging a major cause for mortality across the world. With the healthcare industry set to cross over USD 200 billion mark due to the growth of smart hospitals and medical tourism, the demand for advanced medical equipment and surgical procedures increases, thereby increasing the application at a rapid pace.

The following factors are likely to contribute to the growth of the antimicrobial coatings market during the forecast period:

High Demand from Healthcare Sector

Increasing Demand from Construction Sector

High Demand from Food Industry

Growing Emergence of New Technologies

The study considers the global antimicrobial coating market's present scenario and its market dynamics for the period 2020-2026. It covers a detailed overview of several market growth enablers, restraints, and trends. The report offers both the demand and supply aspects of the market. It profiles and examines leading companies and other prominent ones operating in the market.

Global Antimicrobial Coatings Market Segmentation

The global antimicrobial coatings market research report includes a detailed segmentation by material type, end-user, geography. The global silver material market expects to reach over USD 3 billion by 2026. Silver metals are heavily used in various end-user industries, which contribute over 54% of the market share by value. They are used in the antimicrobial coating due to the broad continuum of antibacterial, antifungal, antiviral properties, less toxicity, high efficiency, and long-lasting effect. In addition, they show low cytotoxicity and immunological response. Therefore, silver nanoparticles are used in the biomedical sector on a wider scale. These materials are finding high applications in medical tomography, molecular diagnostics, and therapeutics such as fabrication of artificial joint replacements, wound dressing, and surgical wire.

The healthcare antimicrobial coatings market is expected to reach over USD 3 billion by 2026, growing at a CAGR of over 7%. The segment accounted for over 54% of the market share in 2020. The healthcare industry is one of the largest end-users. The increasing awareness of hygiene and health safety, growing HAIs cases, and steady increase in chronic orders are stimulating the demand in the healthcare sector. High touch surfaces in hospitals such as surgical equipment, lift-buttons, bedside railings, and IV poles are coated with antimicrobial solutions to prevent the growth of microbes. Currently, North America is the leading market in the application of antimicrobial medical device coating industry; however, APAC is the fastest-growing region.

INSIGHTS BY GEOGRAPHY

North America dominated the antimicrobial coatings market share of approx. 38% in 2020. The US and Canada are the major end-users in North America and accounted for a revenue share of approx. USD 2 billion in 2020. Owing to the growth of HAIs and the steady rise in chronic diseases, the region is expected to grow at the fastest CAGR of over 6% during 2020–2026. Furthermore, the growth in residential and commercial construction activities, the demand for safe and hygienic food, stringent regulations for installing HVAC systems in buildings is likely to boost the demand in North America. In terms of revenue, APAC accounted for over 18% market share in 2020. The region is the fastest growing market for antimicrobial coating and is expected to increase the demand in the coming years. The rise in the geriatric population, the increase in healthcare expenditure, and the high adoption of antimicrobial solutions in several end-user industries such as construction, healthcare, textile, and food & processing industry are the primary factor responsible for the market's growth. China, India, and Japan are the key contributors to the APAC antimicrobial coatings market. China accounts for over 25% share of the market. The demand for antimicrobial coating in China is driven by healthcare, building & construction, textile, and oil & gas industry.

INSIGHTS BY VENDORS

Sherwin -Williams, Akzo Nobel NV, PPG Industries, RPM International, and Axalta Coating Systems are the major players in the antimicrobial coatings market and constitute the maximum share of the market. These companies are at the forefront of delivering innovative and high-quality solutions. Companies have started focusing on sustainability with a commitment to generate more value from fewer resources and turning environmental challenges and societal concerns into product innovations. Several new players entered the antimicrobial coating market with the onset of the COVID-19 pandemic. They expect to expand their presence worldwide during the forecast period, especially in the fast-developing countries in the APAC region, to gain more market share.

KEY QUESTIONS ANSWERED

1. What will be the worth of the global antimicrobial coatings market by the end of 2026?
2. How has the COVID-19 pandemic affected the antimicrobial coatings market?
3. What are the major drivers influencing the growth of the antimicrobial coatings market?
4. Who are the top players in the antimicrobial device coatings market?
5. Who are the major end-users for antimicrobial coatings?

4 SCOPE & COVERAGE

4.1 Market Definition

4.1.1 Inclusions

4.1.2 Exclusions

4.2 Base Year

4.3 Scope of The Study

4.4 Market Segments

4.4.1 Market Segmentation by Material

4.4.2 Market Segmentation by End-User Industry

4.4.3 Market Segmentation by Geography

5 REPORT ASSUMPTIONS & CAVEATS

5.1 Key Caveats

5.2 Currency Conversion

5.3 Market Derivation

6 MARKET AT A GLANCE

7 INTRODUCTION

7.1 Overview

7.1.1 Antimicrobial Classification

7.1.2 Impact of COVID-19

8 MARKET OPPORTUNITIES & TRENDS

8.1 Rising Demand From Healthcare Sector

8.2 Increasing Demand From Construction Sector

8.3 Accelerating Demand From Food Industry

8.4 Growing Demand From Textile Industry

9 MARKET GROWTH ENABLERS

9.1 Emergence Of New Technologies

9.2 Innovation In Existing And New Products

9.3 High Demand For Controlling HAIs

10 MARKET RESTRAINTS

10.1 Health And Environment

10.2 Stringent Government Regulations

11 MARKET LANDSCAPE

11.1 Market Overview

11.2 Geographic Landscape

11.2.1 North America: Key Insights

11.2.2 APAC: Key Insights

11.2.3 Europe: Key Insights

11.2.4 Latin America: Key Insights

11.2.5 Middle East & Africa: Key Insights

11.2.6 Vendor Analysis

11.2.7 Strategic Move

11.3 Market Size & Forecast

11.4 Five Forces Analysis

11.4.1 Threat of New Entrants

11.4.2 Bargaining Power of Suppliers

11.4.3 Bargaining Power of Buyers

11.4.4 Threat of Substitutes

11.4.5 Competitive Rivalry

I would like to order

Product name: Antimicrobial Coatings Market - Global Outlook and Forecast 2021-2026

Product link: <https://marketpublishers.com/r/ACFAE82F9A38EN.html>

Price: US\$ 3,750.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/ACFAE82F9A38EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
