Abstracts

In-depth Analysis and Data-driven Insights on the Impact of COVID-19 Included in this Global Benign Prostatic Hyperplasia Devices Market Report

The global benign prostatic hyperplasia devices market is expected to grow at a CAGR of over 22% during the period 2019–2025.

The global benign prostatic hyperplasia (BPH) devices market is expected to observe an absolute growth of over 242% during the forecast period. The market is growing due to several factors; however, the growing number of the elderly men population is a primary factor responsible for influencing the growth of the BPH devices market. BPH is one of the most common diseases in men, which generally develops after the age of 40 years, with a prevalence rate of around 8–60% between 40 and 90 years. Moreover, it affects about 70% of US men between the age of 60 and 69 years. Approximately 32 million men worldwide experience mild to severe symptoms of BPH. According to several medical studies, there are more than 50% of men above age 50 diagnosed with an enlarged prostate. Besides, there are 4 million men who suffer from BPH. Hence, the high prevalence among men is a major factor contributing to the demand for advanced medical devices.

The following factors are likely to contribute to the growth of the benign prostatic hyperplasia devices market during the forecast period:

Emergence of Innovative BPH Treatment Devices

Popularity of Robotic-assistance Surgical Techniques

Growth in Demand for Minimal Invasive Treatment

The study considers the present scenario of the benign prostatic hyperplasia devices market and its market dynamics for the period 2019-2025. It covers a detailed overview of several market growth enablers, restraints, and trends. The study offers both the demand and supply aspects of the market. It profiles and examines leading companies and other prominent companies operating in the market.

Benign Prostatic Hyperplasia Devices Market Segmentation

The benign prostatic hyperplasia devices market research report includes a detailed segmentation by procedure, end-user, geography. The PUL technology segment is growing due to the increasing patient population and the growing adoption of advanced minimally invasive treatment. PUL is an advanced minimally invasive procedure for the treatment of BPH with less complications. As these procedures can be performed under local, spinal, or general anesthesia or in in-office settings or clinics, the technique is grabbing attention among end-users in developed economies, thereby influencing the segment.

In 2019, the hospital end-user was the largest segment in the global benign prostatic hyperplasia devices market. However, the segment is likely to witness the slowest growth during the forecast period due to the change in patients' preference in terms of treatment. As BPH surgical treatment is witnessing the application of innovative MI devices, BPH surgical care is moving toward out-patient settings. However, the increasing aging population and the growing patient group with BPH have led to high hospitalization rates. Most patients prefer hospitals, especially public ones, as their priority due to the availability of insurance coverage and less out-of-pocket expenses in case of inadequate reimbursement for BPH surgeries. Further, the availability of skilled healthcare professionals with knowledge and expertise in performing both invasive and MI BPH surgeries also attracts more patients to hospitals.

Market Segmentation by Procedure

PUL

Laser Therapy

TURP

Market Segmentation by End-user

Hospitals

Specialty Urology Centers

Ambulatory Surgery Centers (ASC)

INSIGHTS BY GEOGRAPHY

North America is growing at a fast CAGR due to the growing preference for technologically advanced BPH devices. Although the high cost of BPH devices can affect the market adversely, the presence of reimbursement coverage for both invasive and minimally invasive treatment options will have a positive impact on the growth. The availability of reimbursement coverage for several BPH devices is likely to boost the market in the region. North America is currently dominating the TURP segment, with around 150,000 people in the US opting for TURPs annually because of high medical reimbursement facilities. Therefore, the market is growing at significant growth, and the region is dominating the market and expected to dominate in the upcoming years.

INSIGHTS BY VENDORS

The global BPH devices market is fairly concentrated and is characterized by the presence of established vendors holding the majority of the share. There is a significant number of global as well as regional players offering advanced BPH devices in the market. Teleflex, KARL STORZ, Lumenis, Urologix, and Boston Scientific are the key players in the benign prostatic hyperplasia devices market. These companies have a wide geographic footprint, diversified product portfolio, and a strong focus on innovation

and research activities.

Key Vendors

KARL STORZ

Lumenis

Boston Scientific

KEY QUESTIONS ANSWERED

1. What is the market size and CAGR of the global benign prostatic hyperplasia (BPH) devices market?
2. What are the factors impacting the Asia Pacific benign prostatic hyperplasia (BPH) devices market growth?
3. What are the drivers, trends, and restraints impacting the Laser Therapy market?
4. Who are the top vendors of the BPH devices market and what are their market shares?
5. Which region/end-user is the largest revenue generating segment in the BPH devices market?

2 RESEARCH OBJECTIVES

3 RESEARCH PROCESS

4 SCOPE & COVERAGE

4.1 Market Definition

4.1.1 Inclusions

4.1.2 Exclusions

4.2 Base Year

4.3 Scope Of The Study

4.4 Market Segments

4.4.1 Market Segmentation by Procedure

4.4.2 Market Segmentation by End-User

4.4.3 Market Segmentation by Geography

5 REPORT ASSUMPTIONS & CAVEATS

5.1 Key Caveats

5.2 Currency Conversion

5.3 Market Derivation

6 MARKET AT A GLANCE

7 INTRODUCTION

7.1 Overview

7.1.1 Innovations in BPH Treatment

8 MARKET OPPORTUNITIES & TRENDS

8.1 Emergence Of Innovative BPH Treatment Devices

8.2 Increasing Demand For In-Office BPH Treatment

8.3 Popularity Of Robotic-Assistance Surgical Techniques

9 MARKET GROWTH ENABLERS

- 9.1 Increasing Patient Population
- 9.2 Growing Demand For Minimally Invasive Treatment
- 9.3 Technological Advances

10 MARKET RESTRAINTS

- 10.1 Higher Adoption Of Medications
- 10.2 High Cost Of BPH Devices & Surgeries
- 10.3 Complications Associated With BPH Devices

11 MARKET LANDSCAPE

- 11.1 Market Overview
- 11.2 Market Size & Forecast
 - 11.2.1 Procedure
 - 11.2.2 End-users
 - 11.2.3 Geography
- 11.3 Five Forces Analysis
 - 11.3.1 Threat of New Entrants
 - 11.3.2 Bargaining Power of Suppliers
 - 11.3.3 Bargaining Power of Buyers
 - 11.3.4 Threat of Substitutes
 - 11.3.5 Competitive Rivalry

12 PROCEDURE

- 12.1 Market Snapshot & Growth Engine
- 12.2 Market Overview
- 12.3 Prostatic Urethral Lift (PUL)
 - 12.3.1 Market Overview
 - 12.3.2 Market Size & Forecast
 - 12.3.3 Market by Geography
- 12.4 Laser
 - 12.4.1 Market Overview
 - 12.4.2 Market Size & Forecast
 - 12.4.3 Market by Geography
- 12.5 Transurethral Resection Of The Prostate (TURP)

- 12.5.1 Market Overview
- 12.5.2 Market Size & Forecast
- 12.5.3 Market by Geography
- 12.6 Others
 - 12.6.1 Market Overview
 - 12.6.2 Market Size & Forecast
 - 12.6.3 Market by Geography

13 END-USER

- 13.1 Market Snapshot & Growth Engine
- 13.2 Market Overview
- 13.3 Hospitals
 - 13.3.1 Market Overview
 - 13.3.2 Market Size & Forecast
- 13.4 Specialty Urology Clinics
 - 13.4.1 Market Overview
 - 13.4.2 Market Size & Forecast
- 13.5 ASCs
 - 13.5.1 Market Overview
 - 13.5.2 Market Size & Forecast

14 GEOGRAPHY
