Abstracts

In-depth Analysis and Data-driven Insights on the Impact of COVID-19 Included in this Global Fencing Market Report

The fencing market is expected to grow at a CAGR of over 6% during the forecast period 2021-2026.

Homeowners are seeking higher security and privacy, which is driving the demand in the residential market. The rise in commercial and residential building projects is increasing the demand for fencing. The high acceptance of PVC and other plastic materials are gaining traction in the global market. Metals segment to dominate owing to the increasing demand for barbed wire fences that provide higher security. The construction industry is one of the highest revenue generators in the market.

The recent trend of beautifying residents and commercial buildings is surging the demand for fencing globally. The fence around the house adds the overall effect, emphasizing the housing structure and setting the line of control for the people. The application of wood fences is prevalent in rural and semi-urban areas in the US and Canada. The continuous government investment towards public infrastructures such as government premises, public places, museums, and parks supports the growth of the fencing market worldwide.

The report considers the present scenario of the fencing market and its market dynamics for the period 2020-2026. It covers a detailed overview of several market growth enablers, restraints, and trends. The study covers both the demand and supply sides of the market. It also profiles and analyzes leading companies and several other prominent companies operating in the market.

The following factors are likely to contribute to the growth of the fencing market during the forecast period:

Rising Need of Fencing at National Borders

Beautified Residential Fences Offering New Opportunities

Introduction of New Technologies

Rising Agricultural Projects and Need to Protect it From Animals.

FENCING MARKET SEGMENTATION

According to the environmental concerns, aluminum in the metal segment is experiencing higher application as it has a higher recycling rate and lighter in weight compared to other metals. A high-performance metal fence is widely used in small industries as high-security applications where speed and production flow are higher, and safety is crucial. In India, Vedanta was the largest producer in the fencing industry, producing around 2.3 million tons.

Fence installation contractor is providing various advantages to business owners and homeowners. For big house projects, professionals are best for installing fences. Expert advice saves from costly fence installation errors, thereby fueling contractor fencing across the globe. The fencing professionals are acquainted with the legal requirements and ensuring their work adheres to regulations. The global contractor fencing market is growing at a CAGR of around 8% during the forecast period.

Retail sales of fences are higher than online sales, as consumers prefer to shop for the fences in retail stores. Distributors often select the offline retail channel as it enables them to operate their business without high investments in marketing funds. The sudden outbreak of the COVID-19 pandemic is fueling heavy demand in the online distribution channels due to the restrictions imposed by the government agencies. Currently, the traditional retail segment faces intense competition from the online segment due to growing internet penetration.

Fixed fencing surrounds the perimeter of the land and is best suited for long-term use. The fixed fencing is well suited for long-term use and holds the animals much more

effectively. Brick wall fence is most traditional, standard, and majorly used in yard fencing and is mainly preferred in residential colonies in India.

The growth for residential fencing in new construction projects is a significant driver to initiate new opportunities for the players. However, the demand for renovation and retrofit projects is relatively high across Europe. Government-funded projects are focused on high-cost efficiency, thus increasing the demand for plastic fences. Plastic fences are highly cost and thermally efficient than wood and metal counterparts. Chain link fence is becoming popular in the residential market as it requires low maintenance and low cost that keeps unwelcome guests away from your property.

INSIGHTS BY GEOGRAPHY

Strong economic growth in the US and Canada, developments in industrial sectors, and company expansions drive the sales of fencing in North America. With an increased product sale across the region, the demand for the fencing is anticipated to be high in North America during the forecast period.

In emerging markets of Central and Eastern Europe, rapidly developing infrastructure and construction output drive the growth of the European fence market. In big markets such as Germany, France, the UK, Italy, and the Nordic, the market's growth is mainly driven by product innovations introduced by the key players.

COMPETITIVE LANDSCAPE

Vendors are focusing on developing fences with high functionalities and upgrading to keep pace with the latest technological developments and sustain competitive advantage in the market. Bekaert, Associated Materials, Ameristar Perimeter Security, and Poly Vinyl Creations are the key players in the fencing industry. The growth of the players in the market depends on its condition, economic growth, and industry development. Market vendors must introduce and invest in various products to survive and succeed in a competitive environment. Prominent vendors in the market are looking to pursue growth through acquisitions as there are numerous small-scale vendors active in towns and smaller regions.

6 MARKET AT A GLANCE

7 INTRODUCTION

7.1 Overview

7.2 Key Applications

7.2.1 Residential Sector

7.2.2 Agricultural Sector

7.2.3 Construction Sites

- 7.2.4 Government
- 7.2.5 Warehouses and Other Production Centers
- 7.3 Geographical Insights
- 7.4 Impact Of COVID-19

8 MARKET OPPORTUNITIES & TRENDS

- 8.1 Growing Global Population and Real Estate Worldwide
- 8.2 Introduction of New Technologies
- 8.3 Beautified Residential Fences

9 MARKET GROWTH ENABLERS

- 9.1 Rising Need for Fencing Across National Borders
- 9.2 Rising Agricultural Projects and Need To Protect From Animals
- 9.3 Increasing Interest In Home Enhancement

10 MARKET RESTRAINTS

- 10.1 Volatility In Raw Material Prices
- 10.2 Impact Of COVID-19 on The Metal Industry
- 10.3 Volatility In The Construction Industry

11 MARKET LANDSCAPE

- 11.1 Market Size & Forecast
- 11.2 Five Forces Analysis
 - 11.2.1 Threat of New Entrants
 - 11.2.2 Bargaining Power of Suppliers
 - 11.2.3 Bargaining Power of Buyers
 - 11.2.4 Threat of Substitutes
 - 11.2.5 Competitive Rivalry

12 MATERIAL

- 12.1 Market Snapshot & Growth Engine
- 12.2 Market Overview
