Abstracts

In-depth Analysis and Data-driven Insights on the Impact of COVID-19 Included in this Global Hand Tools Market Report

The global hand tools market by revenue is expected to grow at a CAGR of over 4% during the period 2019–2025.

The global hand tools market is expected to grow 1.3X times during the forecast period. The market is expected to witness a considerable growth post-2020. Rapid industrialization and increasing applications in household and commercial sectors are primarily driving the market. Automobile, aerospace, construction, electronics, and shipbuilding are the major end-use of these devices. The tool industry landscape is moving toward sophistication and customization that can determine market leadership in a competitive scenario. Advancements in technology and the extensive usage of battery-driven devices have fueled the adoption of cordless power tools and related accessories that are light and durable. This growth factor for the substitutes is expected to challenge the potential of hand tools. The DIY culture can be one of the major drivers for these devices in the coming years with a high scope for penetration in growing economies.

The global hand tools market suffered a downfall during the COVID-19 crisis as most economic activities were halted during Q1 and Q2 in 2020. Most major revenue-generating end-users such as construction, automotive, commercial renovation, and home improvement activities were affected, leading to a decline in the market sales. Curfews and lockdowns prevented the extensive application of hand tools by workers and contractors, thereby affecting the overall revenue generation for the market during the period.

The following factors are likely to contribute to the growth of the hand tools market during the forecast period:

Rise in Home Improvement and DIY Activities

High Prominence in Asian Manufacturing Sites

Growth in Timber Construction

Growth in Application of Fasteners

The study considers the present scenario of the hand tools market and its market dynamics for the period 2019–2025. It covers a detailed overview of several market growth enablers, restraints, and trends. The report offers both the demand and supply aspect of the market. It profiles and examines leading companies and other prominent ones operating in the market.

GLOBAL HAND TOOLS MARKET SEGMENTATION

This research report includes a detailed segmentation by

Product

End-user

Geography

The general purpose tools segment was the major revenue contributor in 2019 and is expected to grow at a CAGR of over 4% during the period 2019–2025. The volume of works carried out by general purpose devices, which include fasteners, striking tools, and pry bars, has grown significantly among penetrated DIY enthusiasts and for home-improvement professionals. Wrenches, screwdrivers & nut drivers, pliers, hammers, riveters, clamps and vises, wrecking bars, ratchets, and pry bars are the key types of hand tools in the segment. Commercial, residential, and industrial sectors are the major end-users of general purpose equipment, which are extensively utilized to perform small repairs, maintenance and other related project activities.

The industrial end-user segment contributed over 70% of the total market revenue in 2019, with the construction industry accounted for over USD 4 billion, followed by the automotive industry at USD 3.75 billion in 2019. The rise in the aerospace industry is expected to drive the growth of hand drills and fasteners as they are extensive application in assembly activities. While the shipbuilding industry is a major end-user for cutting and striking tools such as hammer, it is expected to grow at a promising CAGR during the forecast period.

The commercial end-user segment is expected to grow at a CAGR of over 4% during the period 2019–2025. The segment is expected to grow at a steady phase in the Middle East & Africa region due to the growth in commercial construction, including hotels and shopping malls. North America was the second largest revenue generator in the segment. The high volume of renovation and retrofit activities in commercial places such as shopping malls, corporate offices, hotels, and restaurants is driving the growth of the segment, whereas the growth in the tourism sector is another major influencer in Latin America and APAC markets, which can gain traction post the COVID pandemic.

The residential end-user category was the lowest revenue contributor that generated USD 2.27 billion in 2019. The preference for power tools, especially in the battery-operated segment for home improvement and DIY activities, is expected to dominate the hand tools market in the residential segment during the forecast period. While devices such as drills, wrenches, saws, utility knives, and measuring tools can find adoption in the sector, heat guns and glue guns from cordless segment are considered as the game changers of the DIY industry.

INSIGHTS BY GEOGRAPHY

China is the major manufacturing hub. The adoption of new equipment for production of a range of products require the importance of portable devices, which can be used in auto-body shops, construction sites, for fastening and assembling operations in retail stores. The automobile and aerospace industries in China make use of drivers and wrenches for mounting and fitting works, thereby influencing the growth of the tools market. The industrial production of Japan increased by 0.9 % in July 2019 and is expected to drive the hand tools market during the forecast period. Manufacturing of high technology vehicles requires prominent use of equipment such as wrenches, drivers, and other automotive tool kits, which are used for assembly, repair, and maintenance operations. Due to the rapid adoption of technology, fast-paced lifestyle, relying on machinery for production and trend of DIY culture, the scope and rise of cordless power tools in Japan is evident and expected to penetrate the market more during the forecast period.

INSIGHTS BY VENDORS

The global hand tools market is characterized by low market concentration and high competition among major players. The present scenario is driving vendors to alter and refine their unique value propositions to achieve a strong market presence. Currently, the market is highly fragmented and dominated by vendors such as Stanley Black & Decker, Emerson, Apex Tool Group, Snap-on and TTI are the major hand tools

manufacturers, alongside numerous domestic manufacturers that produce equipment as per the local demands and regulations. However, these major vendors have a global presence in three major regions: North America, APAC, and Europe which are the major hot spots for tool industry.

4 SCOPE & COVERAGE

4.1 Market Definition

4.1.1 Inclusions

4.1.2 Exclusions

4.2 Base Year

4.3 Scope Of The Study

4.3.1 Market Segmentation by Tool Type

4.3.2 Market Segmentation by End-user

4.3.3 Market Segmentation by Geography

5 REPORT ASSUMPTIONS & CAVEATS

5.1 Key Caveats

5.2 Currency Conversion

5.3 Market Derivation

6 MARKET AT A GLANCE

7 INTRODUCTION

7.1 Overview

7.2 COVID-19 Impact

8 MARKET OPPORTUNITIES & TRENDS

8.1 Rising Home Improvement & DIY Activities

8.2 Rising Prominence Of Asian Manufacturing

8.3 Rising Timber Construction

9 MARKET GROWTH ENABLERS

- 9.1 Growth In Application Of Fasteners
- 9.2 Low-Cost Labor In Growing Economies
- 9.3 Growth Of Automotive Aftermarket Industry

10 MARKET RESTRAINTS

- 10.1 Growth Of Power Tools Market
- 10.2 Tool Safety & Risk Exposure

11 MARKET LANDSCAPE

- 11.1 Market Overview
- 11.2 Market Size & Forecast
- 11.3 Five Forces Analysis
 - 11.3.1 Threat Of New Entrants
 - 11.3.2 Bargaining Power Of Suppliers
 - 11.3.3 Bargaining Power Of Buyers
 - 11.3.4 Threat Of Substitutes
 - 11.3.5 Competitive Rivalry

12 TOOL TYPE

- 12.1 Market Snapshot & Growth Engine
- 12.2 Market Overview

13 GENERAL PURPOSE TOOLS

- 13.1 Market Snapshot & Growth Engine
- 13.2 Market Overview
 - 13.2.1 Market Size & Forecast
 - 13.2.2 Market By Geography
- 13.3 Wrenches
 - 13.3.1 Market Size & Forecast
