Spray hand sanitizers are a niche product segment preferred by selective customer segments across the market. Vendors promote their products across varied sizes, suitable for end-customers to carry along with them to gyms, fitness centers, and other facilities, subsequently providing a complete solution package for hand hygiene. Ethyl alcohol-based hygiene solutions are witnessing high demand during the outbreak of novel coronavirus across the globe. Several governments have introduced a range of emergency instructions for vendors to cater to the staggering need for temporary hand hygiene solutions. To fulfill the huge demand, manufacturers of hygiene solutions seek to get alcohol from corns to surge the production. For instance, Allston Chemical Plant partnered with hospitals to provide hygiene solutions. According to the resources, the company has formulated things for its product line, including ethyl alcohol. The company has also discontinued its product line and made it available for hygiene solutions.

The growth in the food manufacturing setups is likely to boost the recurring demand for disinfectants and sanitizers. The food industry from the recent five years has grown by the rate close to 6% every year in the US, driving the growth of the industrial & institutional disinfectants & sanitizers market share across the country. The fear of receiving infectious materials in packages resulting from chemical warfare has also boosted the demand for hygiene solutions in government offices worldwide.
