In-depth Analysis and Data-driven Insights on the Impact of COVID-19 Included in this U.S. In-vitro Fertilization Market Report

The U.S. in-vitro fertilization market by revenue is expected to grow at a CAGR of 5.45% during the period 2021–2026.

U.S. IN-VITRO FERTILIZATION INDUSTRY INSIGHTS

Over the past few years, the infertility treatment market has been growing at a healthy rate because of rising awareness regarding the availability of various infertility treatment options through the government. Vendors advocating IVF awareness and campaigns are increasing the acceptance of IVF procedures and a surge in fertility tourism, which boosts the growth of the U.S. IVF market. Technological advancements and innovations are being majorly focused on by the fertility clinics and fertility treatment centers to improve the treatment outcomes, surging the growth of the IVF market. Some modern in-vitro fertilization technologies are assisted hatching, Cult-Active, EmbryoGen, Embryo glue, and Intracytoplasmic sperm injection. Investors are purchasing and acquiring fertility clinics with a high success rate of fertility treatment. New investors are discovering the attractiveness of infertility treatment after seeing the success of recent investments and establishing fertility clinics with sophisticated infrastructure.

The following factors are likely to contribute to the growth of the U.S. in-vitro fertilization market during the forecast period:

Technological Advancements & Innovations in IVF

Increasing Private Equity/Venture Capital Funding in IVF Clinics

Rising Number of Obesity Cases

Increasing Number of Fertility Clinics Offering Fertility Services

The study considers the present scenario of the U.S. In-vitro fertilization market and its market dynamics for the period 2020-2026. It covers a detailed overview of several market growth enablers, restraints, and trends.

The report offers both the demand and supply aspects of the market. It profiles and examines leading companies and other prominent ones operating in the market.

KEY HIGHLIGHTS

The consumables segment is likely to witness the highest absolute growth of 43.16% in the U.S. in-vitro fertilization (IVF) market during the forecast period compared to media and equipment product segments.

As the market is witnessing the increased demand for infertility treatments, this created huge competition among the vendors to offer a wide range of innovative media, consumables, and the devices necessary for infertility treatment.

Japan, India, and the U.S. have a greater number of in-vitro fertilization clinics compared to other countries.

VENDOR LANDSCAPE

The US in-vitro fertilization market is characterized by the presence of global, regional, and local vendors. In recent years, the global infertility treatment market has witnessed many strategic initiatives by key vendors, which is expected to intensify market competitiveness in the upcoming years. Infertility treatment is a niche industry with high margins for manufacturers, especially for vendors offering equipment, media, and related consumables, that are widely used during ART procedures. Players are expected to have active participation in the U.S. in-vitro fertilization market to maximize profit.
