## Abstracts

Biosimilars are the officially approved versions of biopharmaceutical products that are manufactured by a different company following the patent expiry of the original product. Also known as subsequent entry biologics or follow-on biologics, biosimilar drugs are gaining popularity around the world as the development cost of biosimilars is not as high as the original drug.

Also, the regulatory frameworks put in place by many countries are aiding the growth of biosimilars in the world, not to mention the lengthy tendering process of biologics that delays the actual launch of the drug. Meanwhile, biosimilar tendering is becoming more and more commonplace as the uptake of biosimilars is growing.

Aruvian Research analyzes the global biosimilars industry in its research report *Analyzing the Global Biosimilars Industry 2016*.

In this research report, we analyze what biosimilars are through an industry definition in the EU, US and Japan. We look at the development of biosimilars, the role of the Biologics Price Competition and Innovation Act, and the role of data exclusivity in the Patient Protection & Affordable Care Act for Biosimilars.

The specific nature of biosimilars and the types of biologics available and role of biosimilars are also analyzed, along with the importance of biosimilars and a comparison between biosimilars and generic drugs.

An overview of the biopharmaceutical industry is included in order to understand the growing importance of biosimilars.

Moving to the analysis of the global biosimilars industry, we analyze the market value, market size, upcoming patent expiries for branded biologics and the operating margins

of biosimilar manufacturers. Market concerns regarding biosimilars is also included.

Factors driving the market for biosimilars, challenges and impacts on the industry, and industry growth factors, are all analyzed in this in-depth report.

We also take a look at the biosimilar market in developed markets and BRIC countries. Approval pathways and regulatory frameworks in the US, Europe, and Japan are analyzed, along with a comparison of European versus US legislation.

For companies wanting to enter the global biosimilars market, we carry out a market entry analysis through our section K of the report, Entering the Global Biosimilar Industry.

Analysis of competition in the industry is carried out through an analysis of the major industry players, industry suppliers, generic drug manufacturers, investors and stakeholders, major launches, and a country-wise analysis of the biosimilar industry. Biosimilar markets are analyzed in Australia, BRIC nations, EU, Japan, and the United States.

An analysis of Epoetin, Filgrastim, and Somatropin - the major biosimilars - is carried out, along with a look at the emerging opportunities for biosimilars due to the upcoming patent expiries.

The response of Big Pharma against the rise of biosimilars is detailed, followed by an analysis of the major markets and major industry players.

An industry forecast for the global biosimilars industry concludes our comprehensive and cutting-edge analysis of the Global Biosimilars Industry.

## Contents

### **A. EXECUTIVE SUMMARY**

### **B. INTRODUCTION TO BIOSIMILARS**

- B.1 What are Biosimilars?
- B.2 Industry Definition in the EU, US, & Japan
- B.3 Development of Biosimilars
- B.4 Biologics Price Competition and Innovation Act
- B.5 Data Exclusivity in the Patient Protection & Affordable Care Act for Biosimilars
- B.6 Specific Nature of Biosimilars
- B.7 Types of Biologics & Role in Biosimilars
- B.8 Why Biosimilars are Important?
- B.9 Biosimilars versus Generics

### **C. INTRODUCTION TO THE BIOPHARMACEUTICAL INDUSTRY**

### **D. ANALYSIS OF THE GLOBAL BIOSIMILARS INDUSTRY**

- D.1 Market Value
- D.2 Market Size
- D.3 Patent Expiries for Branded Biologics: Market Value
- D.4 Biosimilar Manufacturers & Operating Margins
- D.5 Market Concerns Regarding Biosimilars

### **E. INDUSTRY DRIVERS & CHALLENGES**

- E.1 Having a Strong Performance-oriented Strategy
- E.2 Competitor Know-How
- E.3 Sound Financial Platform
- E.4 Having the Economics for Manufacturing Competencies
- E.5 Strong R&D Capabilities
- E.6 Marketing, Sales and Distribution Channels
- E.7 Requirement for Cutting Healthcare Costs
- E.8 High Development Costs of Biologics Having an Impact
- E.9 Patent Expiries for Major Biologics
- E.10 Biosimilars Profitability versus Generics
- E.11 High Cost of Biologics

- E.12 Increase in Use of Branded Biologics
- E.13 US, Japan Approval Pathways
- E.14 EMA Draft Guidelines for Biosimilar MAb
- E.15 Lengthy Tendering Process
- E.16 Reference Pricing
- E.17 Lack of Rebates
- E.18 Need to Contain Healthcare Costs
- E.19 Low Purchasing Power in Emerging Markets
- E.20 Role of Automatic Substitution
- E.21 High Development Costs
- E.22 High Entry Barriers
- E.23 Second Generation Biologic Drugs

## **F. BIOSIMILAR INDUSTRY IN DEVELOPED MARKETS**

## **G. BIOSIMILARS INDUSTRY IN BRIC COUNTRIES**

## **H. APPROVAL PATHWAYS & REGULATORY FRAMEWORK**

- H.1 Overview
- H.2 Objectives of Biosimilar Legislations
- H.3 Biosimilar Regulations in Europe
- H.4 Biosimilar Regulations in Japan
- H.5 Biosimilar Regulations in the US
- H.6 European Regulations versus US Legislation

## **I. ENTERING THE GLOBAL BIOSIMILAR INDUSTRY**

- I.1 Long Clinical Development Timeline
- I.2 Dealing with Biosimilar Approval Pathways
- I.3 High Cost of Development
- I.4 Pricing of Biosimilars in Developed Markets
- I.5 Biosimilars Manufacturing in Emerging Markets
- I.6 Intellectual Property Issues
- I.7 Branded Biologics and Market Exclusivity
- I.8 Importance of Corporate Partnerships
- I.9 Merger & Acquisition Deals

## **J. COMPETITION IN THE INDUSTRY**

- J.1 Players in the Industry
- J.2 Industry Suppliers
- J.3 Generic Drug Manufacturers
- J.4 Large Investors
- J.5 Major Stakeholders
- J.6 Differences between Developed and Emerging Markets
- J.7 Major Launches
- J.8 Market Analysis
  - J.8.1 Australia
  - J.8.2 BRIC Nations
  - J.8.3 European Union (France, Germany, Italy, Spain, the UK)
  - J.8.4 Japan
  - J.8.5 United States

## **K. ANALYZING MAJOR BIOSIMILARS**

- K.1 Epoetin
- K.2 Filgrastim
- K.3 Somatropin

## **L. OPPORTUNITIES FOR BIOSIMILARS WITH THE PATENT EXPIRIES**

- L.1 Overview
- L.2 Opportunities for Biosimilar Monoclonal Antibodies
- L.3 Opportunities for Second Generation Biosimilars

## **M. BIG PHARMA RESPONDS TO BIOSIMILAR THREAT**

- M.1 Overview
- M.2 Strategy of Roche
- M.3 Dealing with the Threat of Insulin Biosimilars
- M.4 Cutting-edge Technology of Insulin Injector Pens
- M.5 Emergence of Insulin Biosimilars
- M.6 Impact of Biosimilars on Sanofi SA and Novo Nordisk

## **N. BIOSIMILAR MARKET ANALYSIS**

- N.1 France

- N.2 Germany
- N.3 India
- N.4 Italy
- N.5 Japan
- N.6 Spain
- N.7 United Kingdom
- N.8 United States

## **O. ANALYZING THE MAJOR PLAYERS**

- O.1 Biocon Limited
  - O.1.1 Corporate Analysis
  - O.1.2 Role in the Biosimilars Industry
  - O.1.3 SWOT Analysis
- O.2 Dr. Reddy's Laboratories Limited
  - O.2.1 Corporate Analysis
  - O.2.2 Role in Biosimilars Industry
  - O.2.3 SWOT Analysis
- O.3 Hospira Inc.
  - O.3.1 Corporate Analysis
  - O.3.2 Role in the Biosimilars Industry
  - O.3.3 SWOT Analysis
- O.4 Sandoz International
  - O.4.1 Corporate Analysis
  - O.4.2 Role in the Biosimilars Industry
  - O.4.3 SWOT Analysis
- O.5 STADA Arzneimittel AG
  - O.5.1 Corporate Analysis
  - O.5.2 Role in the Biosimilars Industry
  - O.5.3 SWOT Analysis
- O.6 Teva Pharmaceutical Industries
  - O.6.1 Corporate Analysis
  - O.6.2 Role in the Biosimilars Industry
  - O.6.3 SWOT Analysis
- O.7 Watson Pharmaceuticals
  - O.7.1 Corporate Analysis
  - O.7.2 Role in the Biosimilars Industry
  - O.7.3 SWOT Analysis
- O.8 3SBio Inc.

- O.9 Biopartners Gmbh
- O.10 Celltrion Inc.
- O.11 Intas Biopharmaceuticals
- O.12 Kyowa Hakko Kirin Co., Ltd.
- O.13 Reliance Life Sciences
- O.14 Shanghai Fosun Pharmaceutical (Group) Co., Ltd
- O.15 Wockhardt

## **P. FUTURE PERSPECTIVE: GLOBAL BIOSIMILARS INDUSTRY**

- P.1 Industry Forecast
- P.2 US Biosimilars Market Outlook
- P.3 European Biosimilars Market Outlook
- P.4 Japan Biosimilars Market Outlook
- P.5 Forecast for the Industry: Analysis of Biosimilar Segments
- P.6 Monoclonal Antibodies against Cancer
- P.7 Erythropoietin (EPO) Biosimilars Markets
- P.8 Human Growth Hormone (hGH) Biosimilars Markets
- P.9 Granulocyte – Colony Stimulating Factor (G-CSF) Biosimilars Markets
- P.10 Insulin and Insulin Analogs Biosimilars
- P.11 Interferon alfa Biosimilars
- P.12 Interferon beta Biosimilars
- P.13 TNF alfa Inhibitor Biosimilars

## **Q. GLOSSARY**

## List Of Figures

### LIST OF FIGURES

Figure 1: Comparison of Biosimilars with Biosimilar Antibodies

Figure 2: Categories of Biosimilars Players

Figure 3: Characteristics of Biosimilar Players

Figure 4: Chromatographic Differences between a Monoclonal Antibody and its Biosimilar

Figure 5: Complexity of Biologics

Figure 6: Medicare Coverage for Biologic Drugs

Figure 7: Imminent Biosimilar Opportunities, 2015

Figure 8: Comparison of Biosimilars with Generics

Figure 9: Development Costs and Timelines for a Biosimilar

Figure 10: Global Biologics Market Forecast, (in USD Billion), 2010–2019

Figure 11: Share of Top 25 Biologics by Therapeutic Class, 2015

Figure 12: Growth for Biologics

Figure 13: Share of Top 25 Biologics by Production System, 2015

Figure 14: Biologics under Development by Therapeutic Class, Global, 2015
