Abstracts

Switchgears are an important part of any transmission and distribution network. With the global transmission and distribution network undergoing a sea change due to the emergence of the smart grid, the market for switchgears is also experiencing a healthy growth rate. Furthermore, new regulations impacting energy efficiency and safety acts are acting as an incentive to the manufacturers of switchgears worldwide to improve the performance of switchgears.

The costing of switchgears holds a lot of important in determining the industry revenues. Costing of switchgears has contributed to the increase in the industry size for switchgears. With a marked decrease in the prices of raw materials like steel, aluminum and copper, the price of switchgears has also seen a downfall in the last couple of years.

Aruvians Rsearch analyzes the Global Market for Switchgears in its research report Analyzing the Global Market for Switchgears. We analyze the global switchgear industry as a whole as well as through various regions. Our analysis includes a look at the global switchgear industry statistics, industry revenues for high voltage, medium voltage and low voltage switchgears.

Key regions analyzed include Asia Pacific, Europe and North America. For each region, we analyze the key markets through industry statistics and a look at the low voltage, medium voltage and high voltage switchgear market segments.

We also analyze the key trends and challenges facing the global switchgear industry, followed by an analysis of the major players in the industry such as Alstom, GE, Powell Industries, and many others. A forecast for the global switchgear industry till 2018 is included, along with an outlook for the various key regions as well.
