Abstracts

With not much major capacity additions planned in the coming years, the German petrochemical industry is expected to maintain stable growth up to 2020. Being the biggest petrochemical market in terms of capacity in the European Union, the country has a friendly regulatory framework promoting business growth. The German petrochemical sector has one of the most sophisticated olefins and aromatics segment, estimated to have olefin capacities of over six tons per annum.

Aruvian Research presents an analysis of the German Petrochemical Industry in its research report Analyzing the Petrochemical Industry in Germany 2016. The report begins with coverage of the global petrochemical industry through an industry overview, the impact of shale gas on the petrochemical industry, global supply scenario, petrochemical growth in developed versus emerging markets, the market for gasoil or diesel, naphtha, bunker fuel as well as jet fuel. Moving on from the analysis of the global market, we focus briefly on the petrochemical industry in Europe.

The petrochemical industry in Germany is analyzed in this report through an industry overview, an analysis of the industry trends and an analysis of the major developments in the industry. A SWOT analysis of the petrochemical industry in Germany and a future perspective of the industry up to 2020 are included in the report. An analysis of the major industry players such as BASF, Bayer and Lanxess AG completes the report.
