Abstracts

The chemical pesticide manufacturing industry in China has been plagued by economic trouble since the recession began in 2008. With weak industry performance continuing since 2008, the industry is struggling hard to overcome weaker demand and low prices of raw materials. The industry had experienced strong growth rates before 2008 and 2009 and it is surprising that with the economic recovery on way, the chemical pesticide manufacturing industry in China has not managed to recover completely.
