Abstracts

The Global Pharmaceutical Industry is the influencer and supplement of the health index of world populations. It is with the constant, untiring and accelerated efforts of this industry's constituents which ensure that countries can find health solutions for their citizens which are backed by world class R& D and provide the same at reasonable costs.

The global pharmaceutical industry meets such regulatory and social challenges by developing country specific studies or coming up with drug lines for continents. This leads to proliferation of global R&D effort and technology transfer initiatives which lead to long term gains for the target countries. Such efforts boost the local economies by bringing in investment and helping in raising the knowledge employment ratios globally.

Aruvian's R'search's report – Analyzing the Major Pharmaceutical Markets - globally is a complete ready country reckoner which offers the analyst at one glance a complete understanding of the commercially active major pharma markets of the world.

These markets are analyzed in the report in terms of their industry statistics, segmentation, player market shares and other market dynamics. The report gives an update on country pharma markets in detail and covers markets like Australia, Belgium, Brazil, Canada, China, Czech Republic, Denmark, France, Germany, Hungary, India, Italy, Japan, Mexico, Norway, Poland, Russia, South Africa, South Korea, Spain, Sweden, Taiwan, The Netherlands, United Kingdom and the United States.

A complete understanding of the global pharmaceutical industry is possible only after delving deeper into the dynamics of countries which influence this industry by contributing in finance, knowledge or other initiatives.
