Abstracts

Canada accounts for just seven percent of the American industrial gases market value. The market is expected to grow at the same pace in the coming years and merchant gases (liquefied, tank delivery) is expected to remain the largest segment of the industrial gases market in Canada. Canada has a vast endowment of crude oil and natural gas resources. Developing these resources today provides hundreds of thousands of jobs for Canadians and contributes to the national wealth and trade balance. Natural gas, petroleum products and the goods and services derived from them play a vital role in almost every aspect of the Canadian economy and lifestyle.

The Canadian industrial gas market is characterized by the presence of large, diversified international companies. The presence of such powerful incumbents' acts as a significant barrier to entry and the need for substantial initial investment to set up high volume production plants also reduces the threat of new companies establishing themselves in this market. Airgas, Inc., Praxair, Inc., Air Liquide SA and Air Products and Chemicals, Inc. are the top players in the market.

Aruvians Rsearch analyzes the industrial gas industry in Canada in its research report Analyzing the Market for Industrial Gases in Canada. The report is a complete coverage of this industry as we analyze the market through an industry overview, an analysis of the industry value, a look at the industry segmentation by products and by geography, among other factors. We also include an analysis of the North American industrial gas market in order to better understand the placement of the Canadian market in the region.

We also include an in-depth analysis of the competition in the Canadian industrial gases market, which is followed by the analysis of the major industry players such as Praxair, Airgas Inc., Air Liquide, amongst others. The players are analyzed through a corporate profile, an analysis of their business segments, a financial analysis, and a SWOT

analysis.

A future perspective of the industry gases market in Canada is included in the report, with forecast ranging from 2011 till 2016.
