Abstracts

Thermoplastic polyesters are the type of polyesters in which the polyester backbones are saturated and hence unreactive. The most common commercial type is PET (polyethylene terephthalate) produced by polycondensation of ethylene glycol. Thermoplastic polyester demand in the US is reckoned to increase significantly by 2016.

Packaging is expected to remain the dominant and fastest growing market segment for thermoplastic polyester. Thermoset resins, primarily unsaturated polyester, will continue to account for nearly 60% of all reinforced plastics demand in 2016. Slightly faster growth, however, is anticipated for thermoplastics due to their better aesthetics and easier processing. Glass fibers, due to their low cost and good performance, will continue to be the dominant reinforcement material, but carbon fiber demand is expected to increase as well in the coming years.

The leading producers of thermoplastic polyesters for the US market are Eastman Chemical, Koch Industries, Celanese Corporation, DuPont (EI) de Nemours, amongst others.

Aruvians Rsearch analyzes the thermoplastic polyester market in the US in its research offering Analyzing the Market for Thermoplastic Polyester in US. The report is a complete analysis of the industry through the leading segments of thermoplastic polyester use in the packaging segment, electrical and electronic segment, automobile segment and other segments.

The report analyzes the US market for thermoplastic polyester through an industry overview, an analysis of the market demand, as well as an analysis of the market by

different types of thermoplastic polyester.

Industry trends across different types of segments are analyzed, followed by an analysis of the industry structure. Import/export of thermoplastic polyester is also looked at.

The industry's future perspective is looked at through a segment-wise market forecast as well as an industry outlook.

An analysis of the major market players such as Eastman Chemical Koch Industries, and others is carried out through a corporate profile, business segment analysis, financial analysis, industry presence, and a SWOT analysis, completing this comprehensive analysis of the Thermoplastic Polyester Industry in the US.
