Abstracts

Australia has been plagued by extreme weather in the recent years, with excessive rainfall and flooding in Queensland, Western Australia, Tasmania, and many other areas. Drought has also constrained the demand for pesticides amongst farmers. With the agricultural industry taking a hit due to such extreme weather conditions, the pesticide manufacturing industry in Australia has not been experiencing the best of growth rates in the last couple of years.

Combined with rising concerns about the safety of pesticides, the pesticide manufacturing in Australia looks set to face a future full of constraints. Environmental controls as well as the rise of pesticide free food are some more barriers that the industry faces.

Aruvian Research analyzes the pesticide manufacturing industry in Australia in its research offering Analyzing Pesticides Industry in Australia. The report is a complete analysis of the industry through an industry overview, industry statistics, an analysis of industry revenues, industry segments, market concentration, manufacturing hubs in the country, and many other factors are analyzed.

We analyze the import/export scenario of pesticides in Australia, along with the capital intensity of the industry, the number of major enterprises operating in the industry, the impact of globalization, as well as a life cycle analysis of the market.

Factors driving growth in the industry, challenges facing the industry, industry cost analysis, and the regulatory framework governing this market are all analyzed in this report.

Technical developments and competition in the industry are analyzed, followed by an analysis of the major players in the industry such as Nufarm Limited, Syngenta, Bayer

CropScience, and others.

We conclude this in-depth report on the pesticide manufacturing industry in Australia with a future perspective of the industry.
