Abstracts

The UK has a vibrant semiconductor industry. UK companies compete in global semiconductor markets by combining technological innovation with business model innovation. The industry has an important impact at the regional level, and the South West semiconductor cluster is one of the largest silicon design clusters in the world.

Many challenges facing the semiconductor industry reflect problems common to many industries: difficulties in recruiting good quality graduates (currently only one in five electrical engineering post-graduates are from the UK), adequate access to finance for start-ups and creating incentives for growing large companies in the UK.

Major players in the industry are Intel Corporation, Samsung Electronics, STMicroelectronics and Texas Instruments. Several industry players have argued that the current tax framework does not incentivize companies to invest in R&D and manufacturing, and arguably recent changes to capital allowances further tilts the tax system away from more capital-intensive companies.

Aruvians Rsearch analyzes the semiconductors industry in the UK in its research presentation Analyzing the Semiconductors Industry in UK. The report is a comprehensive coverage of the industry, which is analyzed through an industry definition, industry profile, market value, industry segmentation, and other factors that impact the market.

We analyze the industry concentration in our report, along with a geographic concentration. Globalization in the global semiconductors industry is also analyzed.

A segmentation of the market through the major industry products is carried out in the report.

Future perspective of the industry is analyzed till the year 2016. We analyze the revenue forecast till 2017 as well as the market value of the industry in 2016.

Competition in the industry and market share of the leading industry players are analyzed followed by an in-depth analysis of the major players themselves. The leading industry contributors are analyzed through a corporate profile, a business segment analysis, a financial analysis, their global industry presence, and a SWOT analysis.

Players analyzed include the industry stalwarts such as Intel Corporation, Samsung Electronics, STMicroelectronics, and Texas Instruments.

Aruvians Rsearch's analysis of the UK Semiconductors Industry is a complete strategic and statistical analysis of this growing industry.
