Abstracts

Wind power in Finland was 143 MW with 118 turbines in December 2008. Wind power is the most popular energy resource among Finnish public: 90 % of Finns would want further investments in wind energy in September 2007. In April 2005 the value was 88 %. In the Pori area of Finland 97 % of people supported wind power according to Suomen Hyötytuuli Oy in 2000.

The rise of wind energy is no longer being looked upon as an alternate source of energy.
