## Abstracts

With the world battling the novel coronavirus pandemic, the impact has been felt on each and every sector and everyday life. Perhaps one of the biggest effects of this pandemic has been on the financial services industry and the insurance industry. In many cases, insurers have already started taking the necessary action for protecting their businesses, which have left many consumers in the lurch in this challenging time. On the other hand, the overall reputation of insurers is taking a further battering as consumers and businesses come to terms with the fact that most insurance policies do not cover pandemics.

With a recession threatening the global economy and an increasing number of insolvencies, the insurance industry and their investments are coming under pressure like never before.

In such a global scenario, Aruvian Research analyzes the unprecedented impact of this pandemic on the insurance industry.

Aruvian Research's report Global Insurance Industry 2021 - A Complete Analysis provides an in-depth analysis of the global insurance industry in these difficult times. The report covers the following:

### **An industry definition.**

An analysis of the global insurance industry through industry statistics, industry value analysis, market segmentation, market share analysis, and an industry forecast. Data included in the report ranges from 2014 till 2024.
