Abstracts

The real estate business is truly unique in the sense that most people will only engage in it once or twice in their entire life. And since purchasing property is such a complicated matter, real estate businesses have laboriously pursued every means to make this transaction as easy, and as informative as possible.

Real estate companies must constantly prioritize and address numerous issues in their business environment, including regulatory changes and shifts, complex international tax demands, as well as other finance-related risks. Responding to these challenges requires both industry and technical knowledge, as well as entrepreneurial thinking.

Now Aruvian's R'search brings you a complete focus on the Global Real Estate Industry, spanning each continent and the major markets of the world. The report covers economic prospects for the real estate industry in every major market, investment scenario, real estate securities, the risks and challenges involved in the industry, and much more. The report is a complete intelligence guide to the global real estate market.
