## Abstracts

India has one of the fastest growing pharmaceutical industries in the world, ranking third in terms of volume. The cities of Bangalore, Hyderabad, Mumbai, Ahmedabad, and others have become lucrative pharmaceutical hubs in India. The Indian government has also been dedicatedly encouraging the growth of drug manufacturing in India. However, the lack of patent protection is a huge issue facing the Indian drugs market at present. Lack of intellectual property rights has made the industry undesirable to many foreign companies looking to invest in the country.

The Indian market for active pharmaceutical ingredients (APIs) has been growing strongly in recent years, led by the generic and biosimilar markets. The patent expiries of several blockbuster drugs that has been ongoing is believed to further contribute to the growth of the active pharmaceutical ingredient market in India. The market for APIs in India is expected to cross revenues of USD 5.5 billion by the end of 2020, with high growth expected post 2020 as well.

The market for APIs in India remains dominated by the synthetic API market since the last decade. The rise of the biotechnology sector in India has caused an increase in biotech API market revenues as well, though the segment continues to lag behind the synthetic API market. It is expected that the synthetic API market will continue to lead the industry in the years to come.

Aruvian Research analyzes the market for APIs in India in its research report Market for Active Pharmaceutical Ingredients in India – Forecast and Analysis 2018. The data covered in this report ranges from 2008 till 2020. Let us take a look at what the report focusses on.

The report begins with an introduction to Active Pharmaceutical Ingredients and then moves on to briefly analyze the global market for active pharmaceutical ingredients. We include an overview of the global market for APIs and a look at the global market's revenues.
