Abstracts

Ukraine is still struggling to control the COVID-19 pandemic, but with approval of the Johnson & Johnson coronavirus vaccine along with vaccines from Pfizer and AstraZeneca, it is expected that the increasing vaccination of its population should make a difference and control the spread of the outbreak.

The pharmaceutical industry in Ukraine is amongst the ten biggest pharmaceutical industries in the Central and Eastern European (CEE) region. With the country adopting new healthcare reform bills from January 2018, the overall outlook for the healthcare and pharmaceutical industry has improved considerably. Both pharmaceutical and healthcare spending is expected to increase in the coming years as the lockdown restrictions are eased, and COVID-19 related vaccine purchases drive up the demand for associated services.

Up until 2014, the Ukrainian pharmaceutical industry was primarily dominated by foreign companies. However, in recent years, Ukrainian companies are making their mark felt in the sector, with Farmak International and Arterium Corporation emerging as the leading industry players.

Aruvian Research presents an in-depth analysis of the Pharmaceutical and Healthcare Industry of Ukraine in its research report Pharmaceutical and Healthcare Industry in Ukraine – Forecast and Analysis 2021. The report covers the following data:
