Abstracts

India, China and Brazil are emerging as the stalwarts in the renewable energy of the developing world.

While India is facing an acute energy scarcity which is hampering its industrial growth and economic progress, it has become essential to tackle the energy crisis through judicious utilization of abundant the renewable energy resources, such as biomass energy, solar energy, wind energy and geothermal energy.

At the same time, China's rapid economic growth and heavy reliance on increasingly expensive foreign oil, the vast environmental toll that is one of the most apparent costs of China's economic success, persistent rural poverty in China and periodic power shortages all have impressed upon the Chinese government that renewable energy must be a large part of China's economy if China is to both complete its economic transformation and achieve 'energy security'. China rapidly has moved along the path of renewable energy development.

Meanwhile, Brazil's energy industry is at a crossroads. After a decade of reforms and privatizations, Brazil is reevaluating its plans to meet growing energy needs following a crippling power shortage that rocked the nation in 2001 and a change of government on January 1, 2003.

The country's energy policies of the last decade have been highly successful. Brazil has transformed itself from a major oil importer whose rising imports from the Middle East were leaving the country with crippling deficits to an expected net exporter of crude oil before the end of this decade.

As renewable energy creates waves in these three countries, it is obvious that investment in the renewable energy industry in India, China and Brazil have gone up. Aruvian Research presents a research report that analyzes the investment in the renewable energy industry in India, China and Brazil.

In its research report Renewable Energy Investment in India, China and Brazil, Aruvian Research's presents a view of the amount and type of investment that the renewable energy market is attracting in these three countries. From venture capital to private equity, there is a sudden wave of investment in the renewable energy market of India, China and Brazil, and this research report takes a look at the various types of investment in the market, and also how much has been invested in which sector, namely solar, wind, biomass, amongst others.

The report starts off with an in-depth analysis of the renewable energy markets in these countries so as to present a complete scenario of what is going on in these markets and why these particular markets are drawing in such large amounts of investment.

Further to this, the investment profile in the renewable energies market is analyzed, keeping in mind the various market sectors.

The report 'Renewable Energy Investment in China, India and Brazil' concludes with a viewpoint on why there is no end to investment in the renewable energy market.

Contents

A. EXECUTIVE SUMMARY

B. ANALYZING THE RENEWABLE ENERGY INDUSTRY IN INDIA

- B.1 India's Energy Industry
- B.2 Renewable Energy Market Profile
- B.3 Challenges to the Development of India's Renewable Energy Industry
- B.4 India's Renewable Energy Goal
- B.5 Wind Power in India
- B.6 Solar Power in India
- B.7 Solar PV in India
- B.8 Biofuels in India
- B.9 Geothermal Energy in India
- B.10 Hydropower in India
- B.11 Regulatory Framework Impacting the Industry
- B.12 Future of the Industry

C. ANALYZING THE RENEWABLE ENERGY INDUSTRY IN CHINA

- C.1 China's Energy Industry
- C.2 Renewable Energy Market Profile
- C.3 Challenges to the Development of China's Renewable Energy Industry
- C.4 China's Renewable Energy Goal
- C.5 Wind Power in China
- C.6 Solar Power in China
- C.7 Solar PV in China
- C.8 Biofuels in China
- C.9 Geothermal Energy in China
- C.10 Hydropower in China
- C.11 Regulatory Framework Impacting the Industry
- C.12 Future of the Industry

D. ANALYZING THE RENEWABLE ENERGY INDUSTRY IN BRAZIL

- D.1 Brazil's Energy Industry
- D.2 Renewable Energy Market Profile
- D.3 Challenges to the Development of Brazil's Renewable Energy Industry

- D.4 Brazil's Renewable Energy Goal
- D.5 Wind Power in Brazil
- D.6 Solar Power in Brazil
- D.7 Solar PV in Brazil
- D.8 Biofuels in Brazil
- D.9 Geothermal Energy in Brazil
- D.10 Hydropower in Brazil
- D.11 Regulatory Framework Impacting the Industry
- D.12 Future of the Industry

E. ANALYZING RENEWABLE ENERGY INVESTMENT IN INDIA, CHINA AND BRAZIL (THIS SECTION LOOKS AT INVESTMENT IN VARIOUS SECTORS OF THE RENEWABLE ENERGY INDUSTRY SUCH AS SOLAR POWER, WIND POWER, ETC., ALONG WITH INVESTMENT TYPES SUCH AS VC AND PRIVATE EQUITY INVESTMENT AS WELL)

- E.1 Introduction
- E.2 Investment Profile in India
- E.3 Investment Profile in China
- E.4 Investment Profile in Brazil

F. HOW MUCH CAN POSSIBLY BE SPENT ON RENEWABLE ENERGY?

G. APPENDIX

H. GLOSSARY OF TERMS

I would like to order

Product name: Renewable Energy Investment in India, China and Brazil

Product link: <https://marketpublishers.com/r/RDC85A5A96BEN.html>

Price: US\$ 850.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
