## Abstracts

A Specialty Chemical is a chemical produced for a specialized use. They are produced in lower volume than bulk chemicals, of which petrochemicals, made from oil feedstocks, are the most common. However, both are produced in a chemical plant. Some examples of specialty chemicals are adhesives, additives, antioxidants, corrosion inhibitors, cutting fluids, dyes, lubricants, pigments, etc.

The chemical industry world over always enjoys a love-hate relationship with communities. Driven by many objectives as well as balancing social concerns with profit and R&D investments, the industry often finds itself straddled with key questions bordering on growth and ensuring sustenance in collaboration with the community.

Aruvian's R'search's report Specialty Chemicals Industry in Belgium researches the characteristics of the Belgian Specialty Chemicals industry and the segments which, as a whole, make up this dynamic machinery of growth.
