Abstracts

Aruvian Research's report Thin Film Solar Cells 2016 earmarks the immense potential that the technology of thin film solar cells holds for the future of mankind and the crucial impact it will have on the process of introduction of solar energy into large scale arenas of the industrialized economies. The report on Thin Film Solar Cells initiates with a strong theoretical understanding of the Solar Cell system and their subsequent propagation into photovoltaic systems including their applications derived from generational leaps as first to third generation cells. The report presents the entire gamut of PV cells in a structured family tree for easy interpretation and also delves into the applications of PV Technology in isolated environment.

It also devotes an entire in depth section to the technical aspects of Thin Film Solar Cells systems including their history as well as mechanism, general operation principles and the new innovations in architecture design of Thin Film Solar Cells which have opened up new markets for solar power systems. These are further explained in the efficient design choices of various configurations and new ideas contributed in this field.

The research report looks at the role of P3HT which is crucial to the development of Thin Film Solar Cells and also at the various properties of silicon that are responsible for making silicon an excellent material in photovoltaics. An analysis of thin film crystalline silicon solar cells, CIGS/CIS-based thin film solar cells, dye-sensitized solar cells, and the latest technological innovation of nanotechnology-enhanced thin film solar cells, is what sets this research report apart from all others.

The report has separate analysis on the various manufacturers in this market based on their specialty. Overall, Aruvian Research's report Thin Film Solar Cells 2016 is a very comprehensive tool for understanding this technology in a in depth manner and deliver thought provoking views on the marvels of this field which is nature's helping hand lent to mankind in order to preserve a way of life which is sustainable as well as in sync with

our environment.

Contents

1 A. EXECUTIVE SUMMARY

B. INTRODUCTION TO PHOTOVOLTAICS

- B.1 Overview
- B.2 Looking at Solar Electricity
- B.3 Photovoltaic Systems
- B.4 Looking at the Balance of System (BOS)
- B.5 Analyzing the 3 Generations of Photovoltaic Cells
 - B.5.1 First Generation PV Cells
 - B.5.2 Second Generation PV Cells
 - B.5.3 Third Generation PV Cells
- B.6 What are Concentrator Cells?
- B.7 Analyzing Concentrated Photovoltaics
- B.8 Applications of Solar Cells
- B.9 Types of Solar Cells
- B.10 PV Technology in Isolated Generation
- B.11 Looking at Thin Film Solar Cells
- B.12 PV Family Tree – A Diagrammatic Representation

C. GLOBAL MARKET OVERVIEW OF SOLAR PV CELLS

- C.1 Market Profile
- C.2 Market Size
- C.3 Growth Patterns of the Market
- C.4 Market Statistics – Production Side
- C.5 Commercialization Potential & Market Development
- C.6 Future of the Market

D. POINT OF DISCUSSION: WHY ARE SOLAR CELLS BASED ON SEMICONDUCTORS?

E. LOOKING AT THE PROPERTIES OF SILICON

- E.1 Why Silicon is the Basis for Photovoltaics?
- E.2 Looking at Crystalline Silicon
- E.3 Looking at Amorphous Silicon

F. ROLE OF ORGANIC SEMICONDUCTORS

G. WHAT ARE THIN FILM SOLAR CELLS?

G.1 Overview

G.2 Categories of Thin Film Solar Cells

G.2.1 Amorphous Silicon

G.2.2 Cadmium Telluride

G.2.3 Copper Indium Gallium Selenide

G.2.4 Dye-sensitized Solar Cell

G.2.5 Organic Solar Cell

G.2.6 Thin-film Silicon

G.3 Structure of the Thin Film Solar Cell

G.4 Efficiency and Cost of Thin Film Solar Cells

G.5 Production of Thin Film Solar Cells

G.6 Looking at Characterization Techniques and Electrical Qualities of Thin Film Solar Cells

H. ROLE OF P3HT

H.1 Overview

H.2 Electrical Properties and Organization of Thin Film Solar Cells

H.3 Optical Properties and HOMO, LUMO Levels in P3HT

H.4 Role of Silicon & P3HT Heterojunction in Photovoltaics

H.4.1 Junctions with Semiconductors

H.4.1.1 MIS Junction

H.4.1.2 Ohmic Contact

H.4.1.3 p-i-n Junction

H.4.1.4 p-n Junction

H.4.1.5 Schottky Contact

H.4.1.6 Semiconductor Heterojunctions

H.4.2 Band Diagrams Based on Silicon and P3HT

I. ANALYSIS OF THIN FILM CRYSTALLINE SILICON SOLAR CELLS

I.1 Overview

I.2 Looking at Thin Film Polycrystalline Silicon Solar Cells

I.2.1 Formation of Microcrystalline Silicon Thin Film Solar Cells and Role of Low

Temperature

I.2.2 Carrier Transport Process in Microcrystalline Silicon Thin Film Solar Cells

I.2.3 Fabrication Rate for Microcrystalline Silicon Thin Film Solar Cells

I.2.4 Light Trapping Quality of Microcrystalline Silicon Thin Film Solar Cells

I.3 Microcrystalline Silicon Thin Film Solar Cells' Applications in Hybrid Solar Cells

I.3.1 Looking at Silicon Hybrid Solar Cells

I.3.2 Developing Techniques for Microcrystalline Silicon Deposits on Large Area Substrates

I.4 Brief Look at Thin Film Silicon Triple Junction Solar Cells

I.5 Summing Up

J. ANALYSIS OF CIGS/CIS-BASED THIN FILM SOLAR CELLS

J.1 Overview of CIGS Photovoltaic Cells

J.2 Structure of a CIGS Thin Film Solar Cell

J.3 Material Characteristics of CIGS Solar Cells

J.4 Phase Diagram

J.5 Defects and Impurities in CIGS Solar Cells

J.6 Techniques for Manufacturing Thin Film Solar Cells

J.6.1 Coevaporation

J.6.2 Sequential Technique

J.7 CIGS Fabrication Technologies

J.7.1 Cell Processing

J.7.2 Module Processing

J.8 Summing Up

K. ANALYSIS OF DYE-SENSITIZED SOLAR CELLS

K.1 Overview

K.2 Comparing Semiconductor Solar Cells vs. Dye Sensitized Solar Cells

K.3 Fabrication Process

K.4 How the Dye Sensitized Solar Cell Operates

K.5 Efficiency of Dye Sensitized Solar Cells

K.6 Degradation in UV Radiation

K.7 Pros and Cons

L. NANOTECHNOLOGY-ENHANCED THIN FILM SOLAR CELLS

M. CASE STUDY: POTENTIAL OF THIN FILM SOLAR CELLS GROWTH ON THE

MOON**N. MANUFACTURERS OF CADMIUM TELLURIDE (CDTE) SOLAR CELLS**

- N.1 Antec Solar Energy AG
- N.2 AVA Solar/Abound Solar
- N.3 Calyxo GMBH
- N.4 Canrom Photovoltaics
- N.5 First Solar
- N.6 PrimeStar Solar

O. MANUFACTURERS OF COPPER INDIUM GALLIUM SELENIDE (CIGS/CIS) SOLAR CELLS

- O.1 Ascent Solar

O.2 AVANCIS

- O.3 Global Solar Energy

O.4 ISET

- O.5 Johanna Solar
- O.6 Miasol?
- O.7 SoloPower

P. MANUFACTURERS OF THIN FILM AMORPHOUS SILICON (A-SI) SOLAR CELLS

- P.1 Bangkok Solar
- P.2 China Solar Energy Holdings
- P.3 CSG Solar
- P.4 EPV Solar
- P.5 Green Energy Technology
- P.6 Heliodom SA
- P.7 HelioGrid
- P.8 Inventux Technologies AG
- P.9 Jinneng Solar
- P.10 Kaneka Solartech
- P.11 Lambda Energia

P.12 Moser Baer Solar Limited

P.13 Nexpower

P.14 Polar PV

P.15 QS Solar

P.16 Sinonar

P.17 Solar Plus

P.18 Sunfilm AG

P.19 Sunner Solar

P.20 Suntech Power

P.21 TerraSolar, Inc.

P.22 XsunX

Q. MANUFACTURERS OF RAW MATERIALS & EQUIPMENT SUPPLIERS

Q.1 Manufacturers of Transparent Conducting Oxide (TCO) Glass

Q.1.1 AFG

Q.1.2 Asahi

Q.1.3 CTDC

Q.1.4 XinYiGlass

Q.2 Manufacturers Ethylene Vinyl Acetate (EVA)

Q.2.1 Bridgestone

Q.2.2 Dupont

Q.2.3 Etimex

Q.2.4 Mitsui Chemicals

Q.2.5 Tecnofimes

R. APPENDIX

S. GLOSSARY OF TERMS
