INTRODUCTION

1,6-Hexanediol is widely used for industrial polyester and polyurethane production.
1,6-Hexandiol can improve the hardness and flexibility of polyesters as it contains a fairly long hydrocarbon chain. In polyurethanes, it is used as a chain extender, and the resulting modified polyurethane has high resistance to hydrolysis as well as mechanical strength, but with a low glass transition temperature. It is also an intermediate to acrylics, adhesives, and dyestuffs. Unsaturated polyester resins have also been made from 1,6-hexanediol, along with styrene, maleic anhydride and fumaric acid.

According to ASKCI data, there were only two manufacturers in China with total output 23 thousand tonnes by 2015. The market demand of 1,6-hexanediol is huge, and strong export demand as well; it is obvious that the market potential of 1,6-hexanediol is huge.

1) The Aim of Report

To provide readers with comprehensive and in-depth understanding of Chinese 1,6-hexanediol product industry;

To analyze the market import and export of 1,6-hexanediol product industry;

To analyze the future trend of 1,6-hexanediol product industry;

To analyze industrial chain of the industry;

To reveal opportunities for 1,6-hexanediol product industry in China.

2) Benefit from the Report

Obtain latest info of 1,6-hexanediol product industry, such as market size, price, key players, etc.;

Find out how Chinese 1,6-hexanediol market will change and how your business can be involved in;

Keep informed of your competitors/their activities in China;

Learn about key market drivers, investment opportunity;

2. SCOPE OF INVESTIGATION

The report will investigate Chinese 1,6-hexanediol industry from the following aspects:

Import and export

Policy

Capacity

Price

Bellwether company

Etc.

3. TIME NEEDED

1-2 work weeks needed.
