1. INTRODUCTION

There were dozens hydroquinone manufacturers in 2012, over 10 of them were larger size companies. Recent years, hydroquinone leading companies have improved manufacturer process; consequently, hydroquinone industry had significant positive influence and was fast developed. However, the new policies issued in 2015 were heavily restricted hydroquinone industrial development due to its pollution problem. The output of hydroquinone has decreased to 19,000 tonnes, and the imported volume was 2,600 tonnes, exported volume was 1,744 tonnes, and the aggregate consumption was 19,900 tonnes.

Based on the research from ASKCI, there are two major manufacturers Lianyungang Sanjili Chemicals Company and Rhodia Chemical Company was still producing hydroquinone. On the other hand, most hydroquinone manufacturers had quit from hydroquinone industry. The estimated output is about 21,000 tonnes in 2016, and the volume will reach 33,000 tonnes in 2021.
