### 1. INTRODUCTION

As an important component to gas, LNG account for 15% of the total gas consumption. With the adjustment of national energy structure and the rising demand for energy, the LNG production is increasing steadily. The production reached over 7 million tonnes in 2015, with year-on-year growth of 8.02%. The demand for LNG was more than 26 million tonnes. Meanwhile, China is the third country which import LNG, the import volume was over 19 million tonnes in 2015, declined 1% for the first time.

Overall, the LNG market is motivated by the effective demand not the suppliers. LNG has a lot advantages, it can save about 35% fuel expense compared with gasoline and diesel. As the expansion of LNG automobile manufacturing and technology is becoming mature, the increasing LNG automobile will be a strong impetus for the LNG industry.
