1. INTRODUCTION

Urban sewage treatment equipment is primarily manufactured by Chinese companies. Domestic sewage treatment equipment production capacity is basically sufficient for domestic needs, and a part of the equipment is exporting to foreign countries. However, the quality of marsh gas generator systems and online monitoring systems are lag behind the products from developed countries.

According to National Bureau of Statistics of P.R.C, water pollution treatment equipment output reached 320 thousand units, which is 54.7% YoY growth in 2015. The major water pollution treatment equipment output areas are mostly distributed in Henan, Beijing, Shandong, Jiangsu, and Zhejiang province, account for 91.2% of the national total output.
