Abstracts

It takes 3-5 business days to dispatch the report after the purchase is made.

Algae Biofuel is one of the promising new energy besides solar energy. Some types of algae can produce oil for energy storage, which means those could be used as biofuel in the future. The output of algae is 10 to 100 times of the traditional biofuel materials such as corns and soybean. As the global biofuel market was approximately USD100 billion in 2013 and the demand continues to grow, algae biofuels will have great potentials in the market.

In this report, ASKCI will further disclose market potential and commercial opportunities for algae biofuels industry in China. Recommendations will be given at the end of the report to describe the prospect and provide suggestions for strategy making.
