Abstracts

In recent years, with the support of the government, women and children's healthcare has made great progress. The mortality rates of pregnant women, new born babies and children under 5 years old have decreased significantly.

By 2011, there were 3557 women and children's hospitals in China. However, the demand of the market outnumbers the supply and more doctors in this specialty are needed. Favorable policies have been carried out by government as well.

In this report, ASKCI will further disclose market potential and commercial opportunities for women and children's hospital in China. Recommendations will be given at the end of the report to describe the prospect and provide suggestions for strategy making.

Contents

EXECUTIVE SUMMARY

DEFINITION AND METHODOLOGY

1 OVERVIEW OF GLOBAL WOMEN AND CHILDREN'S HOSPITAL

- 1.1 Introduction to Maternal and Child Healthcare
- 1.2 Maternal and Child Healthcare Services In Major Regions
- 1.3 Current Development
