ID: MDA692B5E2FEN

Abstracts

It takes 3-5 business days to dispatch the report after the purchase is made.

1. INTRODUCTION

With the development of technology and economy, the aviation transportation is increasingly become one of the most important transportation way. China has the fastest growing total volume of any country in the world. In 2013 China was second only to the United States in total numbers of passengers carried.

There were 21 listed biopharmaceutical companies in 2015, the industry turned in a total profit of 54.8 billion yuan in the first 11 months of 2015, up 76.2 per cent year on year, according to the Civil Aviation Administration of China. Low oil prices have helped the industry save on its biggest single cost and further stimulate demand with lower ticket prices.

Although the mainland economy is expected to grow by less than 7 per cent this year, the transport volume in second and third-tier cities will be higher than first-tier cities. Meanwhile, international travel is expected to contribute more profit, and not just revenue, for mainland airlines in the next 10 years.

1) The Aim of this report

To provide readers with comprehensive & in-depth understanding of China's civil aviation industry;

To understand the development situation of civil aviation industry in China;

Get more information of the major civil aviation suppliers in China;
