Abstracts

It takes 3-5 business days to dispatch the report after the purchase is made.

INTRODUCTION

Chinese mining and resource sectors are both declining due to the reduction in Chinese growth levels recently, and associated steel and coal use and resource commodity price reductions. China is gradually shifting from an industrial based growth driven and export led economy to a consumption led economy with a more sustainable growth rate.

The revenue generated by mining industry reached over RMB260 billion, decreased 58.2%. There were 12 listed mining services companies in 2015.

The Chinese mining industry seeks innovative technologies, equipment and services aimed at improving mining productivity, efficiency, safety and environmental sustainability. In terms of scale, China still remains the world's largest producer of coal and one of the world's largest consumers. Consequently, the mining services companies will be developed in the future.

1) The Aim of this report

To provide readers with comprehensive & in-depth understanding of China's mining services industry;

To understand the development situation of mining services industry in China;

Get more information of the major mining services producers in China;

Gain insight into the major mining services producers about operation;

To predict what future of China mining services industry will be;

To reveal opportunities in China mining services industry.

2) Benefit from the report
