1. INTRODUCTION

The fixed asset investment in power generation equipment industry is one of key industries supported by the central government. With the rapid economic growth, demand for power has contributed to the power generation equipment industry recently.

In 2015, the output of power generation equipment in China reached over 100 million kilowatts nationwide, the installed capacity of thermal power reached over 6 million kilowatts, accounted for 61.1%. The installed capacity proportion of non-fossil energy such as hydropower, nuclear power and wind power increased from 26.53% in 2010 to 38.9% in 2015. There were 24 listed power generation equipment companies in 2015.

The adjustment to the power source structure directly influences the demand structure of power generation equipment. The companies will be more inclined to produce clear power generation equipment.

1) The Aim of this report

To provide readers with comprehensive & in-depth understanding of China's power generation equipment industry;

To understand the development situation of power generation equipment industry in China;

Get more information of the major power generation equipment producers in China;

Gain insight into the major power generation equipment producers about operation;

To predict what future of China power generation equipment industry will be;

-To reveal opportunities in China power generation equipment industry.
