Up to the end of 2015, the output of industrial ammonium chloride in China reached about 610 thousand tonnes and the apparent consumption was nearly 485 thousand tonnes. And the import volume of ammonium chloride, not used as fertilizer, was around 12 billion tonnes and the value was USD383 thousand. The export volume was 126 thousand tonnes or so, with the value of nearly RMB19 million.

Along with more and more investment in the combined-soda field in China, it will drive ammonium chloride industry forward. It is predicted that industrial ammonium chloride will remain a stable rising trend for the next few years. And in 2022, the output will reach about 888 thousand tonnes and the demand will be 790 thousand tonnes. It is clear that there are many opportunities in China industrial ammonium chloride market.
