As an important chemical raw material and alkylating reagent, 1-bromobutane is used to synthesize organic intermediates, including tri-n-butyl phosphine, tetrabutyl ammonium bromide, etc.

At present, the production of 1-bromobutane is concentrated at Jiangsu and Shandong Provinces. Its manufacturers include Rudong Yongtai Chemical Co., Ltd., Yancheng Jinbiao Chemical Industry Co., Ltd., Yancheng Longsheng Chemical Co., Ltd., Shandong Tongcheng Medicine Technology Co., Ltd., Shandong Docris Chemical Co., Ltd. and Yixing Chengyuan Chemical Co., Ltd. In 2015, the output volume of 1-bromobutane in China was about 11.5 thousand tonnes and the market scale was about RMB332 million.

On the one hand, with the fast development of China polyolefin, plastic and fine industries, 1-bromobutane of high purity has a well prospect in China. On the other hand, the growth of 1-bromobutane will slow down, for that 1-chlorobutane, which is cheaper and costs less, can be a substitute of 1-bromobutane in some applications. In 2021, the market scale of 1-bromobutane is predicted to be around RMB457 million.
