Belonging to fine chemical industry, 1-chlorobutane is used in pesticide, medicine, daily chemical and petrochemical industries, with a wide range of applications.

In China, there are relatively adequate raw materials of 1-chlorobutane, and 1-chlorobutane manufacturers possess the core technology of the product and have established scale production and 1-chlorobutane users reduce the import form abroad. The manufacturers include Shandong Tongcheng Medicine Technology Co., Ltd., Yancheng Longsheng Chemical Co., Ltd., Changjili Nre Energy Technology Co., Ltd., Longxing Yueyang Baling Petrochemical Industrial Company and Shandong Docris Chemical Co., Ltd. In 2015, the output volume of 1-chlorobutane in China was around 23 thousand tonnes.

At present, most of 1-chlorobutane in China is produced at Jiangsu, Hunan and Hubei Provinces, and a few at Shandong Province. But manufacturers are much different in scale and quality. Due to the strict requirement of productive technology of 1-chlorobutane, the production is not able to grow fast. However, since the demand at the downstream is increasing, the output of 1-chlorobutane will grow stably in the next few years.
