Bean Products are made with the major ingredients of beans, including soybeans, adzuki beans, mung beans, peas, broad beans and so on. Most bean products are made of tofu or tofu products. Bean products are of rich protein and have some minerals that human bodies need, as well as cellulose and Vitamin B1 and B2.

With the publication and implementation of supporting policies to soybean in China, the problem that plant efficiency of soybeans in China is relatively low will be solved and the plant area will increase. It is predicted that in 2022, the output of beans in China will reach 16.7 million tonnes.

In 2015, the sales revenue of bean product industry was about 73 billion, rising by more than 9%. Since people care more about health, safety, nutrition and other factors of food, healthy and delicious bean products of rich nutrition will be more popular and have a well prospect. In the next five years, the sales revenue will reach RMB111 billion.
