1. INTRODUCTION

According to statistics, in 2015, the sales volume of robots for professional services in the globe was about 41.1 thousand, the robots for individual and domestic use 5.4 million and service robots 5.44 million. The sales value of service robots was USD6.97 billion. As aging population brings more problems to the world and the living level is being improved, the demand for service robots will be larger and larger. And the development of technology will make service robots various in types. In 2021, the market scale of service robots in the globe will be around USD47.69 billion.

In China, service robot industry is still in its first stage and most products are under experiment and a few get into use and industrialization. However, there is a large potential in the demand for the robot. In 2015, the market scale of service robot industry in China will reach about RMB2.96 billion.

In the future, with the problem caused by aging population being more serious and commercialization of service robots being fast, there will be more robots applied in normal families in China. Domestic service robots will come into more people's life and the price will be changed to be accepted the general group. In 2021, the market scale of service robot industry in China is predicted to about RMB15.21 billion.

In this report, AskCI will further disclose market potential and commercial opportunities for venture capital of service robot industry in China. Recommendations will be given at the end of the report to provide analysis on opportunities and risks.

1) The Aim of Report

To provide readers with comprehensive and in-depth understanding of Chinese service robot industry;

To analyze current development of the industry;

To analyze industrial chains of the industry;

To discover drivers and barriers of the industry;

To reveal opportunities for service robot industry in China.

2) Benefit from the Report

Obtain latest info of service robot industry, such as status, supply and demand, upstream, key players, etc.;

Find out how Chinese service robot market will change and how your business can be involved in;

Keep informed of your competitors/their activities in the globe and in China;

Learn about key market drivers and barriers;

Share this information within your organization using free global intranet license.

2. SCOPE OF INVESTIGATION

The report will investigate Chinese service robot industry from the following aspects:

General situation;

Supply and demand

Key players;

Future trend;

Commercial opportunity.

3. TIME NEEDED

Five work days needed.
