1. INTRODUCTION

Dental laser is a new treatment for oral medicine, and it has about 6 kinds of laser had applied to medical treatment, e.g. CO₂, Nd: YAG, Diode, Er:YAG, Er, Cr: YSGG, and Nd: YAP. Compare to western countries, China is underdevelopment in dental laser equipment realm, and clinic application as well. Base on the research from AskCI, 1,500 dental lasers had produced in China in 2014, that market cap worth 300 million.

The third oral epidemiological study shows over 90% of Chinese population have oral diseases. People would have more needs on oral care and oral cosmetic surgery, as people have better disposable personal incomes. Consequently, the demand of dental laser is expanding; in addition, by the technology and government political supports, the dental laser market is extremely large and profitable in the foreseeable future.
